Tree Plantation Program

Conducted on

(02.08.2022)

Venue

College Campus

Organized by

Dr. T. Sreenivas

NSS Coordinator

Lecturer in Political Science

SRGDC

Punganur

Objectives

Students Will Learn,

- To preserve biodiversity by providing habitats for various species of plants, animals, and microorganisms.
- To mitigate climate change by acting as carbon sinks.
- To offer students a practical, hands-on learning experience in environmental promotion, forestry and related fields.
- To learn about the role of trees in ecosystems, including their impact on soil health, water cycles, and overall environmental balance.
- To understand the importance of sustainable practices in mitigating environmental degradation and promoting a balanced ecosystem.

Report

Title: Tree Plantation Program

Date: 02.08.2022

Time: 12.00 PM

Venue: College Campus

The NSS programme officer has conducted and led tree plantation programme in the campus. NSS volunteers, NCC cadets and students under the supervision of NCC Programme officer Sri.S.Saravana, and Dr.T.Sreenivas NCC Programme officer has participated in the programme with the sole aim to tree plants and protect them. NCC cadets were headed and led by NCC officer and a senior cadet. The students were divide into groups and each group was assigned separate duties like digging pita, cleaning the premises and watering the plants. The students have worked

hard and their efforts received heartfelt acclaims and appreciations from the teachers, students and society especially from the principal. At the end refreshments were served to all the participants. Thus, the programme ended on a grand note. The program not only contributed to the greening of the college campus but also instilled a sense of environmental responsibility among the participants.

Outcomes

Students will

- The most direct outcome is the increase in the number of trees, contributing to greater green cover on the college campus and surrounding areas.
- The planted trees provide habitats for various species, promoting biodiversity and ecological balance.
- Students gain practical experience in tree planting, fostering a deeper understanding of environmental science, biology, and forestry concepts.
- Students develop a sense of ownership and pride in contributing to the beautification and environmental health of their college and local community.
- The programme raises awareness among students and the community about the importance of trees in environmental sustainability.
