CIRCULAR

20-04-22

PUNGANUR.

All the students, staff, NCC cadets and NSS volunteers are informed that the NSS is going to organize a tree plantation programme in the college on 21-04-22. Hence all are requested to attend and make it a grand success.

PRINCIPAL
S.R. Govt. Degree College
PUNGANUR - 517 247
Chittoor District.

OBJECTIVES OF THE PROGRAMME:

STUDENTS WILL LEARN,

- Tree plantation programmes for college students can serve various educational, environmental, and social objectives.
- Planting trees contributes to the preservation of biodiversity by providing habitats for various species of plants, animals, and microorganisms.
- Trees absorb carbon dioxide helping to mitigate climate change by acting as carbon sinks.
- Tree Plantation offers students a practical, hands-on learning experience in environmental science, biology, forestry, and related fields.

- Students can learn about the role of trees in ecosystems, including their impact on soil health, water cycles, and overall environmental balance.
- Tree Plantation fosters an understanding of the importance of sustainable practices in mitigating environmental degradation and promoting a balanced ecosystem.

REPORTS OF THE PROGRAMME

On 21-04-22 Dr T Srinivas, NSS programme officer and Sri S Saravana, CTO, NCC has conducted and led tree plantation programme in the campus's volunteers, NCC cadets and students has participated in the programme with the sole aim to tree plants and protect them. NCC cadets were headed by a senior cadet led by a teacher. The students have worked hard and their efforts received heartfelt acclaims and appreciations from the teachers, students and society especially from the principal. At the end refreshments were served to all the participants. Thus, the programme ended on a grand note. The program not only contributed to the greening of the college campus but also instilled a sense of environmental responsibility among the participants.

OUTCOMES OF THE PROGRAMME:

- The most direct outcome is the increase in the number of trees, contributing to greater green cover on the college campus.
- The planted trees provide habitats for various species, promoting biodiversity and ecological balance.

- Students gain practical experience in tree planting, fostering a deeper understanding of environmental science, biology, and forestry concepts.
- Students develop a sense of ownership and pride in contributing to the beautification and environmental health of their college and local community.
- The programme raises awareness among students and the community about the importance of trees in environmental sustainability.
